

Handcrafted Glass

St. Leo glass pieces are individually crafted using traditional techniques, including mouth-blowing and casting, with each piece shaped and finished by hand.

Variations in form, thickness, and surface are inherent, with subtle irregularities, air bubbles, and tonal shifts bringing depth and character to each piece.

For regular care, gently dust with a soft, dry cloth. If needed, a slightly damp cloth may be used. Refrain from using abrasive materials or strong cleaning agents, as these may scratch or dull the surface. Always disconnect power at the circuit breaker or fuse before cleaning.
